GitHub | Portfolio

Summary

Results-driven DevOps & Cloud Engineer with proven expertise in designing, automating, and scaling AWS infrastructure. Skilled in Infrastructure as Code (Terraform), CI/CD pipelines (Jenkins, GitHub Actions), and container orchestration (Docker, Kubernetes/EKS). Adept at implementing GitOps with ArgoCD and Helm, building secure DevSecOps pipelines, and ensuring zero-downtime deployments with Ansible and Nginx. Strong background in monitoring (Prometheus, Grafana), cloud security (IAM, RBAC, secrets management, vulnerability scanning), and optimizing workflows to improve reliability, scalability, and performance. Reduced deployment times by up to 80% and improved system uptime to 99.99%.

Skills

Cloud & Infrastructure: AWS (EC2, VPC, IAM, S3, ALB, Auto Scaling), Terraform, Ansible
CI/CD & Automation: Jenkins, GitHub Actions, Git, GitOps (ArgoCD, Helm)
Containerization & Orchestration: Docker, Kubernetes (EKS)
Monitoring & Observability: Prometheus, Grafana, Alert manager
Security & DevSecOps: IAM, RBAC, Secrets Management, SonarQube, Trivy
Operating Systems: Linux (Ubuntu, CentOS), Windows
Languages & Scripting: Bash, Shell Scripting
Soft Skills: Leadership, Creative Problem-Solving, Team Collaboration, Communication, Time Management

Projects

End-to-End Dev SecOps MERN Application on AWS EKS GitHub

- Built a scalable three-tier MERN application (React, Node.js, MongoDB) deployed on AWS EKS.
- Automated infrastructure with Terraform and CI/CD using Jenkins.
- Implemented GitOps with Helm and ArgoCD for Kubernetes deployments.
- Integrated Prometheus/Grafana for monitoring and applied IAM/RBAC for security.

Git + Ansible + Zero-Downtime Deployment GitHub

- Developed a zero-downtime deployment pipeline using Git, Ansible, and Nginx on AWS EC2.
- Automated updates via Git hooks and load-balanced traffic across multiple servers.
- Enabled real-time monitoring with Prometheus and Grafana.

Jenkins Automated Deployment

- Orchestrated CI/CD pipeline for Java applications with Jenkins.
- Integrated secure credential management and artifact deployment to Nexus.
- Reduced deployment time by 85% through zero-touch automation.

Experience

Accenture — AWS Cloud support Engineer **October 2023 – Current**

- Designed and deployed AWS infrastructure (EC2, VPC, IAM, S3, ALB, Auto Scaling) for enterprise workloads.
- Automated provisioning and scaling with Terraform, reducing manual effort by 40%.
- Built CI/CD pipelines with Jenkins and GitHub Actions, cutting deployment times from 15 minutes to under 2 minutes.
- Containerized applications with Docker and orchestrated workloads on Kubernetes (EKS) following best practices.
- Implemented monitoring with Prometheus and Grafana, improving incident response times by 30%.
- Applied cloud security best practices (IAM policies, least privilege, secrets management, vulnerability scanning).

Accenture —Content Moderation (SME), **April 2018 – Sep 2023**

- Led content moderation operations, ensuring compliance with platform policies and legal standards.
- Reviewed and escalated high-risk content, maintaining accuracy and SLA compliance.
- Provided technical and process guidance to junior moderators, improving team productivity by 20%.
- Conducted root cause analysis and implemented corrective actions, reducing error rates by 15%.
- Created SOPs and training material, reducing onboarding time by 30% and supporting knowledge transfer.

Education

- PG in DevOps & Cloud Computing from DevOps Institute Mumbai (DIM), Thane, Maharashtra.
- Hardware and Networking from Gandhi Institute.

  Mumbai University: - Bachelor of Commerce Year – 2017 (CGPA: 7)

Certifications

- AWS Cloud Practitioner Essentials Knowledge Badge
- AWS Solutions Architect Associate Data Storage Services
- AWS Solutions Architect Associate Managing S3 Buckets
- AWS Solutions Architect Associate Managing Network Infrastructure
- Red Hat System Administrator Advanced Command Line Techniques
- GitHub Copilot Fundamentals
- Red Hat System Administrator Managing Files
- Red Hat System Administrator Linux Package Management
- Red Hat System Administrator Analyzing and Storing Logs
- Red Hat System Administrator Help Commands and Text Editing
- Kubernetes Administrator 2024 Pods, ConfigMaps, and Secrets
- Kubernetes Administrator 2024 Kubernetes Architecture & Components
- Kubernetes Administrator 2024 Application Containers
- Kubernetes Administrator 2024 CKA Exam Sample Scenarios
