Summary

Results-driven Junior Cloud Engineer with a strong internal growth trajectory at Accenture India, demonstrating continuous upskilling and career progression through promotions and internal job programs. Joined Accenture in 2018 as a Fresher Content Moderator, promoted to Subject Matter Expert (SME) in 2020 based on performance and domain expertise. Successfully transitioned into a Cloud Engineer role in 2023 via Internal Job Posting (IJP), after clearing technical evaluations and completing structured training by Accenture-certified trainers.

Skills

Operating System: Linux, Windows ,Cent OS.

Languages: Bash, Shell Scripting
Cloud Platform & Infrastructure: AWS, Terraform, Ansible.
CI/CD & Automation Tools: Jenkins, GitHub Actions.
SecOps Tools : SonarQube, Trivy.
Containerization & Orchestration: Docker, Kubernetes.
Monitoring Tools: Prometheus, Grafana, Alert manager.
AI and other Tools : Helm Chart, ArgoCD, Amazon Q, Chat Gpt, Gemini, Github Copilot,
Soft Skills: Leadership, Creative Thinking, Teamwork, Communication, Time Management.

Projects

End-to-End Dev SecOps MERN Application on AWS EKS GitHub

- Built a scalable, secure three-tier MERN application (React, Node.js, MongoDB) deployed on AWS EKS, implementing end-to-end DevSecOps and GitOps practices. Automated cloud infrastructure with Terraform, CI/CD with Jenkins, and Kubernetes deployments using Helm and ArgoCD. Integrated Prometheus and Grafana for real-time monitoring, ensured high availability through Kubernetes scaling and load balancing, and applied security best practices including IAM, RBAC, and secrets management.

Git + Ansible + Zero-Downtime Deployment GitHub

- Implemented a zero-downtime deployment pipeline using Git, Ansible, and Nginx on AWS EC2.
- Automated application updates via Git hooks, load-balanced traffic across multiple servers, and enabled real-time monitoring with Prometheus and Grafana.

Jenkins Automated Deployment

- Orchestrated a CI/CD pipeline using Jenkins for Java applications, integrating secure credential management, artifact deployment to Nexus, and SSH-based remote execution on EC2 with post-build triggers
- Reduced deployment time from 15 minutes to under 2 minutes through zero-touch automation, significantly improving efficiency and reliability

Experience

April 2018 – Sept 2023

Accenture — Subject Matter Expert (SME)
Content Moderator

- Acted as a Subject Matter Expert (SME) for content moderation operations, ensuring compliance with platform policies, legal regulations, and quality standards.
- Reviewed, analyzed, and escalated high-risk and policy-sensitive content, maintaining accuracy, consistency, and turnaround SLAs.
- Provided technical and process guidance to junior moderators, improving productivity, quality scores, and audit outcomes.
- Conducted root cause analysis for recurring content issues and implemented corrective actions to reduce error rates.
- Collaborated with cross-functional teams (quality, operations, policy, and stakeholders) to optimize workflows and improve operational efficiency.
- Created and maintained process documentation, SOPs, and training material, supporting onboarding and knowledge transfer.

Accenture — AWS Cloud Engineer **October 2023 – Current**

- Transitioned into a Cloud Engineer role via Internal Job Posting (IJP) after clearing internal technical evaluations and completing structured training by Accenture-certified trainers
- Designed, deployed, and managed AWS cloud infrastructure using services such as EC2, VPC, IAM, S3, ALB, and Auto Scaling.
- Implemented Infrastructure as Code (IaC) using Terraform to automate provisioning, configuration, and scaling of cloud resources.
- Built and maintained CI/CD pipelines using Git, GitHub Actions/Jenkins, Docker, and Kubernetes, enabling automated deployments.
- Containerized applications using Docker and orchestrated workloads on Kubernetes (EKS) with best practices.
- Implemented monitoring and logging using Prometheus and Grafana, ensuring high availability and performance.
- Applied security best practices including IAM policies, least privilege access, secrets management, and vulnerability scanning.

Education

PG in DevOps & Cloud Computing from DevOps
Institute Mumbai, Thane, Maharashtra.

Hardware and Networking from Gandhi Institute.

Mumbai University

Bachelor of Commerce Year – 2017 (CGPA: 7)

Certifications

AWS Cloud Practitioner Essentials
AWS Cloud Foundations
AWS Storage & Databases Basics
AWS Security Fundamentals
